**Samuel DE LA CRUZ SOLAL**

## 1. Coordonnées professionnelles

Adresse : Campus St Jean d'Angély, 5 rue du 22ème BCA, 06000 Nice

Email : Samuel.DE-LA-CRUZ-SOLAL@unice.fr

## 2. Positions actuelles

Statut et fonctions : *ATER*

Établissement : EUR ELMI, CNRS, Gredeg

Composante : Économie

Laboratoire(s) de rattachement : GREDEG

## 3. Responsabilités actuelles

Enseignement/recherche (thèse de doctorat)

## 4. Principales thématiques de recherche

*Économie comportementale ; économie expérimentale ; philosophie de l'économie ; nudges ; co-design*.

## 5. Enseignements des 5 dernières années

| Année universitaire | Enseignement | Niveau / formation |
|---|---|---|
| *2026-2027* | TD Microéconomie 1 | Licence 1 |
| *2026-2027* | TD Macroéconomie 1 | Licence 1 |
| *2025-2026* | TD Microéconomie 1 | Licence 1 |
| *2025-2026* | TD Macroéconomie 1 | Licence 1 |
| *2024-2025* | TD Microéconomie 1 | Licence 1 |
| *2024-2025* | TD Macroéconomie 1 | Licence 1 |

## 6. Travaux et productions académiques des 5 dernières années

### Working paper :

**Co-Design Of Behavioural Public Policies: Epistemic Promises and Challenges (2025)**

The aim of this article is to highlight the potential of codesign approaches to address the risk of boomerang effects following the implementation of social norm nudges. I highlight several epistemic causes of the boomerang effect and argue that a co-design of nudges could provide an effective solution to address these causes. Furthermore, I argue that such an approach, based on the deliberation process between citizens and experts, is likely to enhance the ethical aspects of nudging. After a clarification of the notion of 'codesign', which remains quite elusive in the literature, I discuss some challenges that codesign approaches face, in particular regarding the status of 'expert-citizens' in codesign.
